There is nothing wrong with asking for help.

Restaurants in Columbus, OH Currently Using Our Services...

We are currently helping Drellyse Restaurant reduce lots of workload. We manage their website, social media accounts and respond to their Google customer reviews.

Miss Lisa | Owner

**Drellyse African Restaurant
1911 Tamarack Cir North Columbus**

We're building an AI Voice Assistant that helps M&M Chicken and Fish handle customer order calls. We also help the restaurant answer customer reviews, Facebook and Instagram Comments.

Arrif | Owner

**M & M Chicken and Fish
981 Alum Creek Drive Columbus**

We Can Help You Reduce the Workload And Grow Your **Restaurant**

Restaurant business is tough but you don't have to do all the work. We can help.

We Can Take Customer Phone Orders For You to Save You Time

We Can Manage Your Google Customer Reviews

We Can Rank You Better on Google Search Results

We Can Help Increase Your Sales Every Month

We Help Small Restaurants Grow

We can build you a Customized A.I Voice System to take your customer's call orders.

HOW DOES IT WORK?

A Customer Calls To Place an Order

About 98% of customers who call are looking to place an order. When the customer calls your business line, the AI Voice Assistant we'll connect to your business line, will automatically pick up and welcome the customer. The AI Voice Assistant will give callers the option to choose if they want to receive a text message with an order link in it, OR if they want to speak to someone at the restaurant.

Customer asks for an order link
If the customer requests the menu order link, the AI Assistant will automatically send the link to the customer via text message.

Customer asks to speak to a rep
If the customer asks to speak to someone at the restaurant, the AI Assistant will forward the customer's call directly to someone at the restaurant.

This AI Assistant can also answer questions about menu prices, business location, hours, specials, and more. Scan QR code below to see video.

REVIEW MANAGEMENT

Don't worry about managing your Google Reviews. We got it!

When potential customers are looking for a place to eat, most of them look at Google reviews to help them make a decision. People don't believe what you say about your business, but they will believe what others say about your business. If you fail to get reviews or fail to respond to reviews, you are showing the public you don't care too much about customers. We can help you get more reviews and respond to your old and new ones.

LOCAL SEO FOR RESTAURANTS

We can improve your Local Google Search Rankings

If your business is not ranking well on Google, you are likely losing a lot of money. People can't see you online. We have a secret sauce to help you improve your local ranking and get you more sales from your business neighborhood. You don't have to chase customers located far away. We'll also improve your Google Business Profile posts to help you become Google's friend in your local business area.
